
Other services

Do you need some special service or not only borrowing books or access to e-resources? Below you can find services we may offer to students, coworkers of the Faculty of Medicine HK, or public users

Tips for new books

Do you need to supplement the library fund? Have you got a tip for a good book and we don't have it yet? Let us know. Contact: [Radka Masopustová](#)

WI-FI and internet

The Medical Library and its study rooms are covered wi-fi signal, you can use Eduoram network.

The refereces and literature search service

Do you want a list of resources on a particular topic? So you can order a Literature Search Service.

A literature search is a list of found information resources on a given topic (list of literature on a topic). A literature search from scientific databases and library catalogs is processed. It is a selective literature review and the list is in the form of a bibliography.

The Medical Library has a special collection of rare books and journals that students can access for research purposes. We can offer these rare books and magazines to you for your research (through an in-house loan).

Contacts: [Olga Bukačová](#) , [Aneta Pazderková](#)

Interlibrary loan

Libraries can borrow materials from other libraries for students who need access to specific resources. You need a book and the book is not in the Medical Library fund? We can request to borrow from another library.

Contact: [Magda Stradiotová](#)

Copying and printing

For printing, making copies, or scanning - you can use your ISIC card. The charging machine is located in the Department of Theoretical Studies in Šimkova, opposite the stairs, next to copiers. The charging machine only accepts banknotes.

Education

The Medical Library, in cooperation with Charles University, provides access to online educational materials for familiarization with databases, citation software, writing medical theses, avoiding plagiarism, and prevention of predator journals. Our library organizes a workshop for better use of our resources and databases - the best way to get to know the library on the first attempt - on request.
